Final Notes!
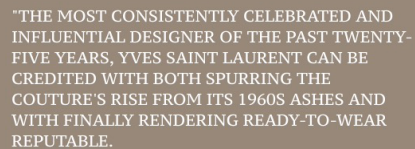

These mockups are fireeeeeee. I also just love how you translated the desktop view into mobile and it's really successful!

A few tiny things:
- For the buttons on the page, let's just unify the style to:

  -
  - And I like the size of the "learn more" button, which is just a bit smaller than the other three (and also you can use the same css rulesets for the buttons hehehe less work for ya :)
- For the carolin milbank quote, I think we can use lowercase so it's a bit easier to read.

  -
- Might be cute to add a footer and credit yourself :)
- The light beige rectangle on the left--I'm wondering if we need that. I like it on the mobile view, but I think we can take it out on the desktop version.

I think thats all, thank you! Excited to see the other pages!
